Fixing Dashboard Mapping

Management → Kibana → Saved → Object

If any component of docker get updated, Kibana re-add all the dashboard. It is important to delete them by searching in the search bar: `cowrie dshield`.

Select and delete them all and download the current map and manually upload it in this same location. Go to this directory: https://github.com/bruneaug/DShield-SIEM/tree/main/scripts

The file to download is: *dshield_sensor_8.11.1.ndjson*

Before you Delete

Saved Objects

Manage and share your saved objects. To edit the underlying data of an object, go to its associated

	Type	Title		Tags
☐	🏷	DShield		
☐	🖧	cowrie*		
☐	📍	DShield Sensor Map - Unique IP by Country		`DShield`
☐	⊘	DShield Logs		
☐	🖥	[Logs DShield Sensor] Overview		
☐	🏷	DShield Sensor		
☐	🖧	cowrie*		
☐	📍	DShield Sensor Map - Unique IP by Country		`DShield Sensor`
☐	⊘	DShield Logs		`DShield Sensor`
☐	🖧	.alerts-security.alerts-default,apm-*-transaction*,auditbeat-*,endgame-*,filebeat-*,logs-*,packetbeat-*,traces-apm*,winlogbeat-*,-*elastic-cloud-logs-*		

After you Imported the Updated Dashboard

The result will look like this after the JSON has been re-imported (5 Titles):
